Claims 1-3, 17-26 and 29-30 are presented for examination.

The amendments and remarks filed on have been received and entered.

Claims 1-3, 17-26, 29 and 30 are rejected Under 35 U.S.C. 103 (a) as being unpatentable over Simpkins et al. for the reasons set forth on pages 2-4 of the office action of December 16, 2009.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant in his remarks argues that Simpkins et al. provides data supporting the combination of polycyclic phenols, such as 17beta-estradiol, alpha-estradiol or estratriene-3-ol with the antioxidant glutathione. The arguments have been noted. It is the examiner's position that obviousness does not require the presence of data. The prior art teaches the use of flavanoids within the scope of the claimed genus for the treatment of Alzheimer's disease. Applicant cancels such compounds in order to overcome the prior art rejection. However, it would have been obvious to a person skilled in the art to substitute one flavanoid for another and use it for the treatment of Alzheimer's.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
